

LAKANTO-S

“Sweet Sugary Taste of 100%
Natural Sweetener with 0 Calories”

Natural Sweetener for Diabetics and Full-scale Dieters

Granule type : 120g, 210g, and 1kg in plastic bag.
Stick type : 5g×15sticks and 5g×30sticks
Cube type : 180g

● Good Heat Resistance

LAKANTO-S is a sweetener with remarkable thermal-resistant stability. Even in the long-term boiling conditions, LAKANTO-S does not discolor nor degrade, neither does the degree of sweetness decrease nor bitterness develop.

● Sweetener with 0 cal energy, made from 100% natural materials

LAKANTO-S is a vegetable-derived sweetener prepared by adding high-purity extracts of Luo han guo, used regularly as folk medicine for ailments such as phlegm and cough in China from ancient times, to erythritol, produced by fermenting glucose derived from corn.

Almost all LAKANTO-S ingested is absorbed in the small intestines. It is not metabolized in the body, but rather more than 90% is quickly discharged in urine. Consequently, LAKANTO-S is a sweetener which scarcely generates energy in the human body.

● Sharp and Sophisticated Sweetness Quality

Only high-purity Luo han guo extracts obtained by selective fractionating and purifying the sweet-taste components contained in Luo han guo are formulated into LAKANTO-S, and sophisticated and sharp sweetness quality has been obtained.

● No Rise in Blood Sugar Level

Even if LAKANTO-S is taken in, serum insulin or blood sugar level does not rise. LAKANTO-S is particularly useful for diabetics, who need to restrict energy intake.

Changes of blood sugar level and insulin secretion rate in living body when ingested.
